## INSULATED ROLLING SHUTTERS

The versatile rolling shutters door and window coverings that have been widely used in Europe for over 100 years. They offer energy savings, privacy and security, while enhancing the value and beauty of the home. Although insulated rolling shutters are associated with security and sun control, they can also decrease dust, noise and sun damage to furniture, draperies and carpets.

Rolling shutters now have become extremely popular not only in Europe, but around the world. In many European countries, such as Germany, Italy, France and Spain, roll shutters are a standard feature on homes and businesses.

## ALUMINIUM STAINLESS STEEL FINISH

The advantages of aluminium material with stainless steel look is versatile in comparison with actual stainless steel. For a start, aluminium is a lot lighter than stainless steel and it is easy to process. Thanks to the anodised aluminium surface, the material also offer a high corrosion resistance. When working, no fingerprints will be visible on the surface, and it can be cleaned using conventional cleaning agents. In addition, aluminium can be recycled.

## LARGE PROJECTS

**Graham Aluminium also caters for large scale Projects where Aluminium/Iron Works are required.**

**Common types of projects that Graham Aluminium specialize in, are:**

**Appartment Blocks  
Factories  
Shops  
Offices**
